# WHAT ARE CONDITIONALS?

CONDITIONALS ALLOW YOUR PROGRAM TO MAKE DECISIONS BASED ON CERTAIN CONDITIONS. THEY HELP CONTROL THE FLOW OF THE PROGRAM!

# THE IF STATEMENT

THE IF STATEMENT  
CHECKS A CONDITION.  
IF IT'S TRUE, THE CODE  
BLOCK UNDER IT  
EXECUTES.

```
age = 18
if age >= 18:
    print("You are an adult.")
```

# THE ELSE STATEMENT

THE ELSE STATEMENT  
RUNS WHEN THE IF  
CONDITION IS FALSE.

```
age = 16
if age >= 18:
    print("You are an adult.")
else:
    print("You are a minor.")
```

# THE ALIF STATEMENT

USE ELIF TO CHECK  
MULTIPLE CONDITIONS.  
IT'S SHORT FOR "ELSE  
IF".

```
score = 85
if score >= 90:
    print("Grade: A")
elif score >= 80:
    print("Grade: B")
else:
    print("Grade: C")
```

# REAL-WORLD EXAMPLE

IMAGINE A WEATHER APP!

```
temperature = 75
if temperature > 85:
    print("It's hot outside!")
elif temperature > 65:
    print("It's warm outside!")
else:
    print("It's chilly outside!")
```

SINCE 2006

**FUTURE VISION**

# CONCLUSION

CONDITIONALS ARE POWERFUL TOOLS FOR  
CONTROLLING PROGRAM LOGIC. USE THEM TO CREATE  
DYNAMIC AND RESPONSIVE APPLICATIONS!
